Areas of contribution

Observations

Summary

During the "YOPP Special Observing Periods" (July 1st to September 30th, 2018), we plan to launch intensive radiosondes (4 times per day) along the cruise route of Chinese Icebreaker XUELONG in the Arctic Ocean.

Description

To contribute to the special observing efforts of YOPP, we plan to implement intensive radio sounding activities along the cruise route of XUELONG icebreaker. The radiosoundes will be launched 4 times per day in the Arctic Ocean and the data will be uploaded in near real time to YOPP data portal via GTS.

Timeline
Regional emphasis

Northern hemisphere: Yes
Southern hemisphere: No

Key project deliverables

To contribute to the special observing efforts of YOPP, we plan to implement intensive radio sounding activities along the cruise route of XUELONG icebreaker. The radiosoundes will be launched 4 times per day in the Arctic Ocean and the data will be uploaded in near real time to YOPP data portal via GTS.

Data management

Institute of Polar Meteorology
Chinese Academy of Meteorological Sciences
China Meteorological Administration

Is data provided to WMO Global Telecommunication System

Yes

Real-time provision

near real-time radio sounding data to GTS.
